

SupaTite End Restraint Flange Adaptors and Couplings

The Cascade SupaTite range of fittings are a substantial and hard-wearing product line. The built in locking bolts reinforce the fittings attachment to the pipe, making the connection tighter and securer, massively decreasing risks of failure. Now with the new 4G variant with 4X the grippers. The range consists of Flange adaptors, couplings reducing couplings and adapters. Cascade can also fabricate these to specifications, including reduced flange sizes.

Pipe sizes: DN350 to DN1400, other sizes available on request.

Pipe types: Ductile Iron, Cast Iron, Steel, PE, PVC and Asbestos Cement.

Large tolerance allows for ovality.

"Now 4X the grip... Still half the price..."

Specifications

- Main body and rings made from Carbon steel.
- Screws, pins, nuts and washers Grade 8.8 galv.
- WRAS approved materials.
- WRAS approved gasket.
- PN16 - Permissible working pressure (PWP): 16 bar.
- End Restraint capabilities 161kN to 260kN Dependant on pipe type.
